-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

Applicant's election without traverse of claims 1-14 is acknowledged. Claims 15-18 were canceled by the applicant.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 -14 are rejected under 35 U.S.C. 102(b) as being anticipated by Taylor (2075372). Taylor discloses

a throat (9) for receiving a handle; a scoop (14) distal from the throat; a pair of sidewalls (7) extending from the throat to the scoop; a ball stop (12) adjacent the throat; and a pair of floating ribs (5) corresponding to each of the pair of sidewalls, each of the floating ribs having a first end and a second end separated by a middle portion wherein the first end is joined proximal the throat and the second end is joined proximal the side wall and a segment of the middle portion is not attached to the sidewall (fig 1).

As to claim 2 : Taylor discloses a middle portion is attached to neither the sidewall nor the throat (fig 1).

Art Unit: 3711

As to claim 3 : Taylor discloses a space between the floating rib and the sidewall (fig 1).

As to claim 4 : Taylor discloses a greater distance between the inner portion of the floating ribs than the distance between the sidewalls (fig 1, 3).

As to claim 5 : Taylor discloses an apex further from the lower portion than the upper portion (fig 1,3).

As to claims 6 and 10 : See claim 1 rejection.

As to claims 7 and 11 : Taylor discloses a middle portion unattached to the lacrosse head (5, fig 1)

As to claims 8 and 12 : Taylor discloses an open space ( fig 2)

As to claims 9 and 13 : Taylor discloses an apex ( fig 2)

As to claim 14 : Taylor discloses a greater distance between the inner portion of the floating ribs than the distance between the sidewalls (fig 1, 3).

Also,

Claims 1 - 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Morrow et al (6902501). Morrow discloses

a throat (22) for receiving a handle; a scoop distal from the throat (20); a pair of sidewalls (58) extending from the throat to the scoop; a ball stop adjacent the throat (54); and a pair of floating ribs (16) corresponding to each of the pair of sidewalls, each of the floating ribs having a first end and a second end separated by a middle portion (the design of the open sections between the floating ribs and sidewalls are considered a design choice) wherein the first end is joined proximal the throat and the second end

Art Unit: 3711

is joined proximal the side wall and a segment of the middle portion is not attached to the sidewall (fig 3).

As to claim 2 : Morrow discloses a middle portion is attached to neither the sidewall nor the throat (The un-numbered area below item 16 in fig 3).

As to claim 3 : Morrow discloses a space between the floating rib and the sidewall (fig 3).

As to claim 4 : Morrow discloses a greater distance between the inner portion of the floating ribs than the distance between the sidewalls (fig 3).

As to claim 5 : Morrow discloses an apex further from the lower portion than the upper portion (the vertical distance would be greater, fig 3,4).
